
Message from the Editor

Dear Reader,

Greetings to everyone, and welcome to another of our special issues. This one stems from the 2017 ESP Symposium that CUE held at Keio University. Thank you to everyone who made that gathering happen!

I am happy to report once again that we received quite a few papers that were extensions of the posters which people presented. Abstracts and PDF copies for all posters at the symposium, not just those in this issue, are available online at <http://jaltcue.org/content/cue-esp-symposium-2017>.

The formatting for each poster write-up may not be consistent, but that is because we were trying to accommodate the many needs and styles of the writers. We'll work on standardizing things for the next issue, so bear with us.

Thank you to Steve Suzuki for serving as guest editor this time, and thanks to all of the people involved in the vetting and editing process. We couldn't have done it without you.

It looks like we have had a similar if not greater response from people who presented at the 2018 anniversary conference, so look forward to that issue in 2019. Meanwhile, dig in and check out what great papers this current issue holds.

Glen Hill

CUE SIG Publications Chair and *OnCUE Journal* chief editor
